Allowable Subject Matter

1.   Claims 1-58 are allowed.

2.   The following is an examiner's statement of reasons for allowance:

Prior art does not teach that, a third conductive antenna segment coupling

the first and second conductive antenna segments; a reference voltage coupling

on the first conductive antenna segment; and a feed coupling on the first

conductive antenna segment, wherein a current null is present on the first

conductive antenna segment between the feed and reference' voltage couplings

at the operating frequency band in combination with all limitations recited in

independent claims 1 and 28.

Prior art does not tech that, a first and second reference voltage couplings

on the conductive antenna element wherein an electrical distance between the

feed coupling and ' the first reference voltage couplings is less than an electrical

distance between the first and second reference voltage couplings and wherein

an electrical distance between the feed coupling and the second reference

voltage coupling is less than the electrical distance between the first and second

reference voltage couplings in combination with all limitations recited in

independent claim 14 and 40.

Any comments considered necessary by applicant must be submitted no

later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Troelsen (US 6,646,610) and Scott et al. (US 6,738,023) are cited to show a PIFA structure for radio communication.
